#### High-Density Can Liners:

- are up to three times stronger, and weigh half as much as low-density liners
- are an excellent economical choice for heavy, wet trash and soft refuse
- offer superior vapor and moisture protection
- have smaller, lighter cases, which lower freight, storage, and warehousing costs
- are more temperature-resistant than low-density liners (-40°F to +212°F)

#### Low-Density Can Liners:

- are lower cost and suited for applications where trash is high bulk and low weight

FYI

#### STRENGTH GRADE KEY

**Light**—For crumpled papers, cups, light waste, etc.

**Medium**—For packaging waste, wet paper, etc.

**Heavy**—For light wood, metal scraps, wet cardboard, etc.

**Extra-Heavy**—For heavy, sharp or wet trash.

**Super/Extra-Heavy**—For heaviest cleanup jobs in warehouse, cafeteria or facility grounds.
